

The ;ackage-name package*

author name[†]

yyyy/mm/dd vx.x

`\mymacro` The package-name package enables writers to ...
explanation of the macro.

`\anothermacro` `{⟨arg1⟩}{⟨arg2⟩}`... This is the syntax of the command for ...

`{⟨arg1⟩}` is argument 1.

`{⟨arg2⟩}` is argument 2.

Here's an example code:

```
\mymacro
\anothermacro{foo}{bar}
```

Code and output:

```
\mymacro\anothermacro{a}{b}
```

This is the output.
